

# What are students and educators saying about **MyLab Accounting** ?

**Dr Olayinka Uadiale**, Senior Lecturer in Accounting at **Brunel University** shares her experience of using **MyLab Accounting**.

 I'm really happy with MyLab Accounting. It allows me to ensure students truly understand the information we teach, setting them up to compete confidently with anyone globally.

 The resources are great. They can actually monitor their learning and every week we can actually test their understanding of whatever topic that we've given to them by setting them exercises on MyLab Accounting.

 MyLab Accounting is always going to be a yes for me and I will always recommend it... I think it's a brilliant platform, particularly if you want engagement from your students and want to be able to monitor their progress. It's very good.

 MyLab Accounting contributed to the overall pass grade, engagement, and high success of the mid-term test. My observation is that during this semester students are more engaged - not only with theory but they take more time to practice.
