

0:04
There's a gap between the world of study
0:06
and the real world of work this is
0:08
creating a daunting experience for
0:09
students navigating skill development
0:11
and career search resolving this within
0:14
The classroom is both necessary and
0:16
complicated for faculty that face
0:17
pressure to produce job ready graduates
0:19
but don't have industry connections nor
0:21
time to develop employer specific
0:23
learning opportunities forage Bridges
0:25
the Gap by bringing career Readiness
0:27
into the classroom through job
0:29
simulations job simulations show
0:31
students what it's like to actually work
0:32
at a specific company in a specific role
0:35
each simulation is custom built by
0:37
forage with hundreds of top employers
0:39
like City BCG and GE to reflect their
0:42
actual culture and work with
0:44
Partnerships with nearly 1500 us
0:46
universities students get a better
0:48
understanding of the company and build
0:50
actual real world skills that these
0:52
companies value simulations typically
0:54
take a few hours to complete and start
0:56
by identifying the role the student
0:58
plays within the organization what
1:00
they'll do and the tasks they need to
1:01
complete the simulations use real life
1:04
departments and teams from the companies
1:06
with scenarios based on real world work
1:08
products the company uses and the actual
1:10
team members just as they would in the
1:12
real world team members provide

1:14
background information instructions and
1:16
additional resources they might need
1:19
once submitted they get a model answer
1:20
from the company being what the company
1:22
would actually have wanted in real life
1:24
students can provide feedback on the
1:26
experience that gets sent directly to
1:28
forage and the employer to ensure
1:29
ongoing quality enhancements once they
1:32
complete the simulation they unlock
1:33
insights that improve their chances of
1:35
Landing a job at that company such as
1:37
interview or resume tips and a
1:38
certificate that can be shared on
1:41
LinkedIn there's a reason why millions
1:43
of students use these simulations and
1:45
that's because they Foster job ready
1:46
students that are more than two times
1:48
more likely to get hired by for's
1:50
employer
1:55
partners
