

# Increase Student Engagement with Learning Catalytics

Learning Catalytics gives EVERY student a voice.

Engage students by posing a variety of unique question types that help them recall ideas, apply concepts, and develop critical-thinking skills.

Your students then respond using their own smartphones, tablets, or laptops.

Without saying a word, students are able to tell you when they do—and don't—understand.

You can monitor student responses with real-time analytics and find out where they are struggling.

Using this information, you're able to adjust your teaching accordingly, facilitate peer-to-peer learning, and address student misconceptions the moment they occur.

With Learning Catalytics, you'll hear from EVERY student when it matters.
