CONTENTS

SECTION 1

College Mathematics for Business, Economics, Life Sciences & Social Sciences
Twelfth Edition
by Raymond A. Barnett, Michael, R. Ziegler and Karl E. Byleen

PART 1 A LIBRARY OF ELEMENTARY FUNCTIONS

Chapter 1 Linear Equations and Graphs 4
1-1 Linear Equations and Inequalities 5
1-2 Graphs and Lines 15
1-3 Linear Regression 29
Chapter 1 Review 41
Review Exercises 42

Chapter 2 Functions and Graphs 45
2-1 Functions 46
2-2 Elementary Functions: Graphs and Transformations 60
2-3 Quadratic Functions 72
2-4 Polynomial and Rational Functions 87
2-5 Exponential Functions 97
2-6 Logarithmic Functions 108
Chapter 2 Review 119
Review Exercises 122

PART 2 FINITE MATHEMATICS

Chapter 3 Mathematics of Finance 128
3-1 Simple Interest 129
3-2 Compound and Continuous Compound Interest 135
3-3 Future Value of an Annuity; Sinking Funds 147
3-4 Present Value of an Annuity; Amortization 155
Chapter 3 Review 166
Review Exercises 168

Chapter 4 Systems of Linear Equations; Matrices 171
4-1 Review: Systems of Linear Equations in Two Variables 172
4-2 Systems of Linear Equations and Augmented Matrices 185
4-3 Gauss–Jordan Elimination 193
4-4 Matrices: Basic Operations 207
4-5 Inverse of a Square Matrix 220
4-6 Matrix Equations and Systems of Linear Equations 230
4-7 Leontief Input–Output Analysis 239
Chapter 4 Review 247
Review Exercises 248

PART 3 CALCULUS

Chapter 10 Limits and the Derivative 254
10-1 Introduction to Limits 255
10-2 Infinite Limits and Limits at Infinity 269
10-3 Continuity 282
10-4 The Derivative 293
10-5 Basic Differentiation Properties 306
10-6 Differentials 315
10-7 Marginal Analysis in Business and Economics. 322
Chapter 10 Review 332
Review Exercises. 333

Chapter 11 Additional Derivative Topics 338
11-1 The Constant *e* and Continuous Compound Interest. 339
11-2 Derivatives of Exponential and Logarithmic Functions. 345
11-3 Derivatives of Products and Quotients 353
11-4 The Chain Rule 361
11-5 Implicit Differentiation 371
11-6 Related Rates 378
11-7 Elasticity of Demand 383
Chapter 11 Review 391
Review Exercises. 392

Chapter 12 Graphing and Optimization 394
12-1 First Derivative and Graphs 395
12-2 Second Derivative and Graphs. 412
12-3 L'Hôpital's Rule 429
12-4 Curve-Sketching Techniques 438
12-5 Absolute Maxima and Minima 451
12-6 Optimization 459
Chapter 12 Review 472
Review Exercises. 473

Chapter 13 Integration 477
13-1 Antiderivatives and Indefinite Integrals 478
13-2 Integration by Substitution 489
13-3 Differential Equations; Growth and Decay 500
13-4 The Definite Integral 511
13-5 The Fundamental Theorem of Calculus 521
Chapter 13 Review 533
Review Exercises. 535

Chapter 15 Multivariable Calculus 539
15-1 Functions of Several Variables 540
15-2 Partial Derivatives 549
15-3 Maxima and Minima 557

15-4 Maximas and Minima Using Lagrange Multipliers 566
15-5 Method of Least Squares 575
15-6 Double Integrals over Rectangular Regions 585
15-7 Double Integrals over More General Regions 595
Chapter 15 Review 604
Review Exercises. 606

SECTION 2

Introduction to Econometrics
by James H. Stock and Mark M. Watson

PART ONE INTRODUCTION AND REVIEW

CHAPTER 1 Economic Questions and Data 611
1.1 Economic Questions We Examine 611
1.2 Causal Effects and Idealized Experiments 615
1.3 Data: Sources and Types 617

CHAPTER 2 Review of Probability 624
2.1 Random Variables and Probability Distributions 625
2.2 Expected Values, Mean, and Variance 628
2.3 Two Random Variables 636
2.4 The Normal, Chi-Squared, Student *t*, and *F* Distributions 646
2.5 Random Sampling and the Distribution of the Sample Average 653
2.6 Large-Sample Approximations to Sampling Distributions 657
Appendix 2.1 Derivation of Results in Key Concept 2.3 672

CHAPTER 3 Review of Statistics 674
3.1 Estimation of the Population Mean 675
3.2 Hypothesis Tests Concerning the Population Mean 680
3.3 Confidence Intervals for the Population Mean 689
3.4 Comparing Means from Different Populations 691
3.5 Differences-of-Means Estimation of Causal Effects Using Experimental Data 693
3.6 Using the *t*-Statistic When the Sample Size Is Small 696
3.7 Scatterplots, the Sample Covariance, and the Sample Correlation 701
Appendix 3.1 The U.S. Current Population Survey 714
Appendix 3.2 Two Proofs That $\overline{Y}$ Is the Least Squares Estimator of $\mu\gamma$ 714
Appendix 3.3 A Proof That the Sample Variance Is Consistent 715

CHAPTER 4 Linear Regression with One Regressor 717
4.1 The Linear Regression Model 717
4.2 Estimating the Coefficients of the Linear Regression Model 722
4.3 Measures of Fit 729
4.4 The Least Squares Assumptions 732
4.5 Sampling Distribution of the OLS Estimators 737
4.6 Conclusion 741
Appendix 4.1 The California Test Score Data Set 749
Appendix 4.2 Derivation of the OLS Estimators 749
Appendix 4.3 Sampling Distribution of the OLS Estimator 750

CHAPTER 5 Regression with a Single Regressor: Hypothesis Tests and Confidence Intervals 754
5.1 Testing Hypotheses About One of the Regression Coefficients . . . 754
5.2 Confidence Intervals for a Regression Coefficient 761
5.3 Regression When *X* Is a Binary Variable 763
5.4 Heteroskedasticity and Homoskedasticity 765
5.5 The Theoretical Foundations of Ordinary Least Squares 771
5.6 Using the *t*-Statistic in Regression When the Sample Size Is Small 774
5.7 Conclusion 776
Appendix 5.1 Formulas for OLS Standard Errors 784
Appendix 5.2 The Gauss–Markov Conditions and a Proof of the Gauss–Markov Theorem 785

CHAPTER 6 Linear Regression with Multiple Regressors 789
6.1 Omitted Variable Bias 789
6.2 The Multiple Regression Model 796
6.3 The OLS Estimator in Multiple Regression 799
6.4 Measures of Fit in Multiple Regression 803
6.5 The Least Squares Assumptions in Multiple Regression 806
6.6 The Distribution of the OLS Estimators in Multiple Regression . . . 808
6.7 Multicollinearity 809
6.8 Conclusion 813
Appendix 6.1 Derivation of Equation (6.1) 821
Appendix 6.2 Distribution of the OLS Estimators When There Are Two Regressors and Homoskedastic Errors 822
Appendix 6.3 The Frisch–Waugh Theorem 822

CHAPTER 7 Hypothesis Tests and Confidence Intervals in Multiple Regression 824
7.1 Hypothesis Tests and Confidence Intervals for a Single Coefficient 824
7.2 Tests of Joint Hypotheses 829
7.3 Testing Single Restrictions Involving Multiple Coefficients 836
7.4 Confidence Sets for Multiple Coefficients 838
7.5 Model Specification for Multiple Regression 839

7.6 Analysis of the Test Score Data Set 845
7.7 Conclusion 850
Appendix 7.1 The Bonferroni Test of a Joint Hypothesis 858
Appendix 7.2 Conditional Mean Independence 860

CHAPTER 8 Nonlinear Regression Functions 862
8.1 A General Strategy for Modeling Nonlinear Regression Functions . 864
8.2 Nonlinear Functions of a Single Independent Variable 872
8.3 Interactions Between Independent Variables 884
8.4 Nonlinear Effects on Test Scores of the Student–Teacher Ratio . . . 896
8.5 Conclusion 904
Appendix 8.1 Regression Functions That Are Nonlinear in the Parameters 916
Appendix 8.2 Slopes and Elasticities for Nonlinear Regression Functions 919

CHAPTER 9 Assessing Studies Based on Multiple Regression 922
9.1 Internal and External Validity 922
9.2 Threats to Internal Validity of Multiple Regression Analysis 926
9.3 Internal and External Validity When the Regression Is Used for Forecasting 937
9.4 Example: Test Scores and Class Size 939
9.5 Conclusion 949
Appendix 9.1 The Massachusetts Elementary School Testing Data 955

Appendix 957
Appendix A Basic Algebra Review 965
Appendix B Special Topics 1007
Appendix C Tables 1022
A Library of Elementary Functions 1027
Answers 1029
Subject Index 1078
Index of Applications 1095
