

GEORGE BOOKER | DENISE BOND | REBECCA SEAH

# TEACHING PRIMARY MATHEMATICS

6TH EDITION

# CONTENTS

Preface .....	ix
About the authors .....	xi
Features of this edition.....	xii
Educator resources .....	xiv

## SECTION 1

### Mathematics teaching and learning 1

#### CHAPTER 1

##### Approaches to mathematics teaching and learning 6

##### Learning mathematics..... 7

Learning as a social activity .....

Learning using instructional games .....

Learning using apps, electronic resources and calculators.....

##### Numeracy and teaching mathematics..... 14

Numeracy overview .....

Using materials to develop mathematics ....

Language and mathematics .....

Symbols in mathematics.....

##### Assessment in mathematics..... 29

National Assessment Program in Literacy and Numeracy (NAPLAN) .....

Diagnostic assessment .....

##### Chapter reflections..... 42

#### CHAPTER 2

##### Problem solving 43

##### Problem solving ..... 45

What is a problem?.....

Strategies and problem solving .....

Problem solving as a process.....

##### The problem solving process ..... 52

Using the model to solve problems.....

##### Making sense in mathematics ..... 64

Number sense .....

Spatial sense.....

Measurement sense .....

Data sense.....

##### Problem solving and communication..... 74

##### Worthwhile problems..... 76

Selecting, adapting and extending problems..

##### Problem writing..... 82

##### Assessing problem solving ability and likely difficulties ..... 87

Likely difficulties .....

##### Chapter reflections..... 91

## SECTION 2

### Number and algebra 95

#### CHAPTER 3

##### Numeration for whole numbers 100

##### Understandings and processes for numeration..... 101

Naming numbers.....

Renaming numbers .....

Number processes .....

Teaching numeration.....

Learning numeration .....

Place value.....

##### 1 digit numbers: the basis for all numbers..... 109

Naming numbers.....	111
Counting.....	115
<b>Early mathematical thinking.....</b>	<b>116</b>
Comparing, sequencing and ordering.....	120
Ordinal numbers.....	121
The concept of ten.....	122
<b>2 digit numbers: establishing a system of place value.....</b>	<b>125</b>
Numbers 20–99.....	125
The teen numbers.....	131
Number processes.....	134
<b>3 digit numbers: consolidating place value and establishing renaming.....</b>	<b>140</b>
Renaming numbers.....	144
<b>Thousands—4, 5 and 6 digit numbers: consolidating renaming and extending place value.....</b>	<b>150</b>
4 digit numbers.....	150
5 and 6 digit numbers.....	153
<b>Rounding.....</b>	<b>156</b>
Rounding 2 digit numbers.....	157
Rounding 3 digit numbers.....	160
Rounding 4 digit and larger numbers.....	162
<b>Large numbers: extending the system for naming numbers.....</b>	<b>164</b>
A second place value system.....	164
Exponential and scientific notation: the basis for a third form of place value.....	168
Factors and products.....	169
Scientific notation.....	172
Expanding the number system to include negative numbers.....	175
<b>Children’s literature and number.....</b>	<b>179</b>
<b>Chapter reflections.....</b>	<b>180</b>

## CHAPTER 4

Computation for whole numbers: additive thinking.....	184
Understandings and processes for additive thinking.....	185

Additive concepts: using <i>part/part/whole</i> to establish addition and subtraction.....	185
Additive basic facts: strategies for addition and subtraction.....	187
Algorithmic thinking: processes for adding and subtracting larger numbers.....	188
<b>Developing addition.....</b>	<b>190</b>
The addition concept.....	191
Learning the addition basic facts.....	197
Developing the addition algorithm.....	207
Estimation with addition.....	216
Adding numbers mentally.....	219
Using calculators in addition.....	220
<b>Developing subtraction.....</b>	<b>223</b>
The subtraction concepts.....	224
Learning the subtraction basic facts.....	233
Developing the subtraction algorithm.....	238
Estimation with subtraction.....	245
Subtracting numbers mentally.....	246
Using calculators in subtraction.....	247
<b>Chapter reflections.....</b>	<b>250</b>

## CHAPTER 5

Computation for whole numbers: multiplicative thinking.....	253
Understandings and processes for multiplicative thinking.....	254
Multiplicative concepts: using arrays to establish multiplication and division.....	254
Multiplicative basic facts: strategies for multiplication and division.....	256
Algorithmic thinking: processes for multiplying and dividing larger numbers.....	257
<b>Developing multiplication.....</b>	<b>259</b>
Multiplication concepts.....	260
Learning the multiplication basic facts.....	267
Developing the multiplication algorithm.....	281
Estimation with multiplication.....	294
Multiplying numbers mentally.....	296
Using calculators in multiplication.....	297

<b>Developing division</b> .....	<b>300</b>
The division concepts .....	302
Linking division to the nearest multiplication fact. ....	309
Developing the division algorithm. ....	315
Division with 2 digit divisors .....	330
Estimation with division .....	333
Dividing numbers mentally .....	335
Using calculators in division. ....	336
<b>Combining multiplicative and additive thinking.</b> .....	<b>339</b>
<b>Children’s literature and multiplicative thinking.</b> .....	<b>342</b>
<b>Chapter reflections.</b> .....	<b>343</b>

## CHAPTER 6

### Numeration and computation for fraction ideas 347

<b>Understandings and processes for fraction ideas.</b> .....	<b>348</b>
<b>Developing the fraction concept.</b> .....	<b>354</b>
Language and models .....	354
<b>Recording fractional amounts</b> .....	<b>361</b>
Decimal fractions. ....	361
<i>Addition with decimal fractions.</i> .....	369
Per cents. ....	380
<i>Multiplication with per cents.</i> .....	382
Common fractions. ....	385
<i>Renaming common fractions.</i> .....	390
<i>Addition with like common fractions.</i> .....	396
<i>Subtraction with like common fractions.</i> .....	398
<i>Renaming as equivalent fractions</i> .....	400
<i>Subtraction and addition with unlike common fractions.</i> .....	404
<i>Multiplication with common fractions.</i> .....	407
Renaming among all fraction forms .....	408
<b>Ratio and proportional reasoning.</b> .....	<b>412</b>
<b>Chapter reflections.</b> .....	<b>419</b>

## CHAPTER 7

### Algebra and algebraic thinking 423

<b>Historical origins of algebra.</b> .....	<b>425</b>
<b>Developing algebraic thinking.</b> .....	<b>428</b>
Patterning .....	429
<i>Patterns in number.</i> .....	436
<i>Repeating and growing patterns</i> .....	438
Problem solving as a basis for developing algebraic thinking. ....	442
<i>Building an ability to generalise</i> .....	443
<i>Building relational thinking.</i> .....	447
Building to symbolic representations. ....	451
<i>Using symbols</i> .....	452
<b>Chapter reflections.</b> .....	<b>458</b>

## SECTION 3

### Measurement and geometry 461

## CHAPTER 8

### Measurement 464

<b>The importance of measurement</b> .....	<b>465</b>
<b>Historical aspects of measurement</b> .....	<b>466</b>
<b>Learning to measure</b> .....	<b>470</b>
Learning sequence for measurement. ....	470
The role of language. ....	472
The role of estimation and approximation .....	473
The role of activities and investigations. ....	474
<b>Teaching measurement</b> .....	<b>475</b>
Teaching length .....	476
Teaching area .....	487
Teaching volume and capacity .....	496
Teaching angle .....	501
Teaching mass .....	505
Time .....	509
Temperature .....	517
<b>Money and financial literacy.</b> .....	<b>520</b>

<b>Children's literature and measurement . . .</b>	<b>522</b>
<b>Chapter reflections . . . . .</b>	<b>525</b>

## CHAPTER 9

<b>Geometry</b>	<b>531</b>
-----------------	------------

<b>The importance of geometry . . . . .</b>	<b>532</b>
---	------------

<b>Learning geometry . . . . .</b>	<b>534</b>
------------------------------------	------------

Representations . . . . .	535
---------------------------	-----

Visualisation . . . . .	535
-------------------------	-----

Language . . . . .	536
--------------------	-----

Learning progression for geometric thinking . . . . .	537
---	-----

<b>Teaching geometry . . . . .</b>	<b>539</b>
------------------------------------	------------

Shape . . . . .	540
-----------------	-----

2 dimensional (2D) shapes . . . . .	540
-------------------------------------	-----

3 dimensional (3D) objects . . . . .	555
--------------------------------------	-----

3 dimensions to 2 dimensions and back . . . . .	561
---	-----

Location and transformation . . . . .	568
---------------------------------------	-----

Location . . . . .	568
--------------------	-----

Transformations . . . . .	576
---------------------------	-----

Tessellation . . . . .	581
------------------------	-----

Symmetry . . . . .	582
--------------------	-----

Geometric reasoning . . . . .	585
-------------------------------	-----

Visualising geometric relationships . . . . .	586
---	-----

Angles, triangles and polygons . . . . .	588
--	-----

<b>Chapter reflections . . . . .</b>	<b>594</b>
--------------------------------------	------------

## SECTION 4

<b>Statistics and probability</b>	<b>599</b>
-----------------------------------	------------

### CHAPTER 10

<b>Statistics and probability</b>	<b>603</b>
-----------------------------------	------------

<b>Statistics . . . . .</b>	<b>604</b>
-----------------------------	------------

Teaching statistics . . . . .	604
-------------------------------	-----

Framework for working with data . . . . .	605
---	-----

Formulating questions . . . . .	606
---------------------------------	-----

Collecting and organising data . . . . .	607
--	-----

Analysing data . . . . .	609
--------------------------	-----

Representing data . . . . .	616
-----------------------------	-----

Showing relationships . . . . .	628
---------------------------------	-----

Interpreting data . . . . .	632
-----------------------------	-----

<b>Probability . . . . .</b>	<b>633</b>
------------------------------	------------

Language and probability . . . . .	635
------------------------------------	-----

Probability terminology . . . . .	636
-----------------------------------	-----

Teaching probability . . . . .	642
--------------------------------	-----

Framework for developing probability concepts . . . . .	642
---	-----

<b>Linking statistics and probability . . . . .</b>	<b>648</b>
---	------------

Investigations to link statistics and probability . . . . .	649
---	-----

Investigation one . . . . .	649
-----------------------------	-----

Investigation two . . . . .	650
-----------------------------	-----

Investigation three . . . . .	651
-------------------------------	-----

<b>Chapter reflections . . . . .</b>	<b>652</b>
--------------------------------------	------------

## SECTION 5

<b>Teaching for meaning</b>	<b>655</b>
-----------------------------	------------

### CHAPTER 11

<b>Connecting ideas across mathematics</b>	<b>657</b>
--	------------

<b>Foundations of mathematics learning . . .</b>	<b>658</b>
--	------------

Linking numeration, additive thinking and fraction ideas . . . . .	660
--	-----

Linking multiplicative thinking with numeration, fraction ideas and additive thinking . . . . .	664
---	-----

Linking measurement and geometry to number . . . . .	668
--	-----

Linking statistics and probability to number, measurement and geometry . . . . .	670
--	-----

<b>Chapter reflections . . . . .</b>	<b>671</b>
--------------------------------------	------------

References . . . . .	672
----------------------	-----

Index . . . . .	680
-----------------	-----
