

DIGITAL ASSESSMENT APPS

Evidence-based resources for literacy screening and intervention

Adapted for use in Australia and New Zealand

Pearson Australia is proud to partner with OxEd & Assessment (OxEd) to bring their evidence-based oral language and reading resources based on the Science of Learning research to Australia and New Zealand.

Who are OxEd?

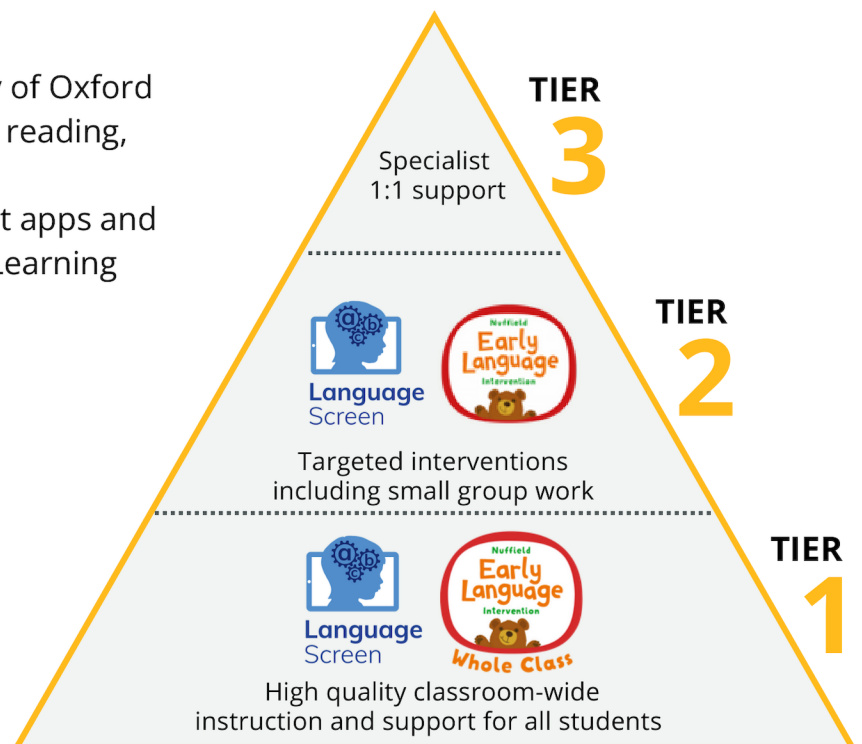

- A spinout company from the University of Oxford
- Founded by world-experts in children's reading, language and memory skills
- Creators of evidence-based assessment apps and interventions based on the Science of Learning research

Oral language difficulties permeate all subjects; social sciences, health, maths, science – because language is the “vehicle” that carries information underlying each of these areas.

— Jenny Baker, Director
Fremantle Speech Pathology Services

Support a multi-tiered system of support with OxEd resources

EVIDENCE-BASED DIGITAL ASSESSMENT Professional Bundle

Suitable for Foundation to Year 6

The OxEd & Assessment Professional Bundle, comprising of LanguageScreen and ReadingScreen, is used to assess the oral language and reading abilities of students.

Without requiring manual analysis, accurate and meaningful insights including a Simple View of Reading report are generated immediately, providing reliable data to assist you in identifying children that would benefit from intervention and to track the impact of intervention over time.

An easy-to-use, scientifically proven app that can be administered by teachers, teacher aides or any adult to accurately assess oral language skills of all students aged 3.5 to 11 years old.

Test 1. Expressive Vocabulary

Identify each picture

Test 2. Listening Comprehension

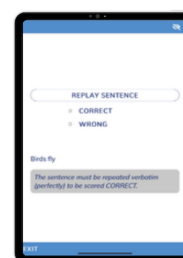

Answer short questions about short texts

Test 3. Receptive Vocabulary

Match the picture to the spoken word

Test 4. Sentence Repetition

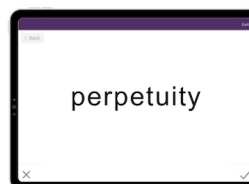

Repeat sentences of increasing complexity out loud

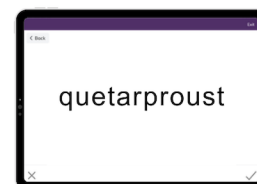

An easy-to-use, scientifically proven app that can be administered by teachers, teacher aides or any adult to accurately assess word and nonword reading of all students aged 4.5 to 12 years old.

Test 1. Word reading

Test 2. Nonword reading

Simple View of Reading report

An easy to interpret digital report that is automatically generated after students are assessed with both LanguageScreen and ReadingScreen. The report shows individual and class results, and immediately highlights if students have difficulty with decoding, comprehension or both.
